In this week's meeting, we were honored to have **Dr. Sanjay L. Kulkarni, MD Anesthesia**, as our guest speaker. Dr. Kulkarni delivered a crucial presentation on "**Jeevan Sanjivani – Basic Cardiac Life Support.**" The focus of the speech was on equipping our members with essential skills and knowledge to provide timely and effective assistance in case of cardiac emergencies.

Dr. Kulkarni provided insights into the importance of **Basic Cardiac Life Support (BCLS)** and its role in saving lives during cardiac emergencies. The speech covered the fundamental principles of BCLS, including recognizing cardiac arrest. The first step after this emergency is to make sure that the victim and person providing assistance are both safe, the 2nd step it to pat the victim on both shoulders, and calling to him loudly, in case the victim is still not responsive, dial 108 and call for a cardiac support ambulance. The process of providing CPR (Cardiopulmonary Resuscitation), and using automated external defibrillators (AEDs) was explained in detail. Dr. Kulkarni emphasized the critical role of timely intervention in cardiac emergencies, stressing that timely intervention increases the survival chance of the victims to 40–50%. The presentation included practical demonstrations and hands-on techniques to ensure that our team gains a practical understanding of BCLS procedures.

Following the presentation, there was a Q&A session where attendees also shared experiences, and engaged with Dr. Kulkarni to deepen their understanding of BCLS.
